## Replens™ Long-Lasting Vaginal Moisturizer is different than most other lubricants

Many women discover they have vaginal dryness and discomfort during intimacy. Some lubricants help in the moment, but they rarely provide lasting moisture.

Replens™ Long-Lasting Vaginal Moisturizer lasts days longer than most traditional lubricants. It goes to work immediately providing soothing moisture for dry vaginal cells, then continues to deliver moisture for up to 3 days.

### Step 1

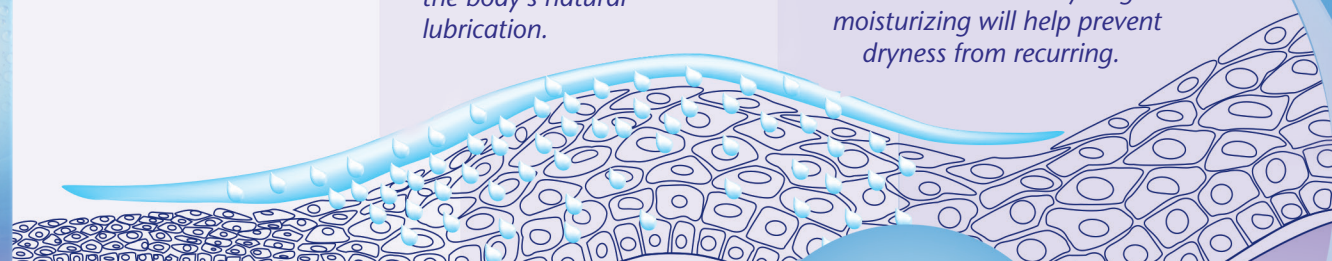

Replens™ Long-Lasting Vaginal Moisturizer immediately goes to work providing soothing moisture to dry vaginal cells for long-lasting hydration.

### Step 2

It delivers continuous moisture which vaginal cells absorb, regaining natural integrity and elasticity for up to 3 days, helping to replenish moisture to dry cells and supplementing the body's natural lubrication.

### Step 3

As the cells of the vaginal wall are regenerated, dead cells are cleared and Replens™ Long-Lasting Vaginal Moisturizer is eliminated naturally. Regular moisturizing will help prevent dryness from recurring.

### Confidence & Comfort
